

Robosol AppSource Licensing

Quick Reference Guide

Version 28.0.0.0 | Robosol Software UK Limited | Dynamics 365 Business Central

What it does

Manages the trial, grace period and licence enforcement for every Robosol ISV module installed from Microsoft AppSource. No manual setup — a 14-day trial activates automatically on install, and licences re-validate silently once a day.

Licence flow

Renew any time — buying mid-trial or in grace returns the module to Active at the next daily check, or instantly via Refresh Status.

Get started in three steps

- 1 Install any Robosol module from AppSource — licensing is included automatically.
- 2 Sign in to Business Central. The 14-day trial activates on first use. Nothing to configure.
- 3 Optional: Tell Me → "Robosol License Status" to confirm the module shows Active.

Key facts

Zero setup

Trial provisions itself on install — no keys, no wizard.

Daily validation

Silent re-check at first sign-in each day.

Offline safe

If Robosol is unreachable, the last known status is used — work never stops.

Grace, not cliff

7-day grace with daily reminders before anything is blocked.

Privacy

Only your Microsoft Tenant ID is shared — no business data leaves your tenant.

Control

Refresh Status and Test Connection actions on the License Status page.

Status colours on the License Status page
